FOR IMMEDIATE RELEASE  
9 A.M. EDT, September 9, 2008

## **DISNEY-MCLANE & ASSOCIATES TO REPRESENT WATTS WATER TECHNOLOGIES AND WATTS DRAINAGE IN NORTHERN OHIO**

Watts Water Technologies and Watts Drainage has named Disney-McLane & Associates as their representative for Northern Ohio effective September 29, 2008.

Heading up the Northern Ohio sales team will be Brent Westover, Chuck Williams and Chris Dattilio.

Founded in 1874 by Joseph Watts, Watts Regulator Company made its reputation by "Setting The Standard in Valve Technology." During its early days, Watts manufactured pressure reducing valves to regulate steam and relief valves to ensure safe operation of water heaters and boilers.

In the 1900's, Watts introduced the revolutionary combination temperature and pressure (T&P) relief valve, a protection device for use on hot water supply tank systems. These T&P valves prevented dangerous hot water heater explosions and continue to be an integral part of today's water heating systems.

In the 1970's, Watts was instrumental in the promotion of backflow prevention devices to prevent the backward flow of contaminated water from entering into the potable water supply. Watts continues to lead the backflow prevention market today.

Today, Watts Regulator is part of the Watts Water Technologies family with operations in North America, Europe and Asia. Watts designs, manufactures and sells an extensive line of flow control products for
